'facts about neon lights sciencing  
May 31st, 2020 - neon lights are most  
monly associated with storefront signs  
and use neon gas in hollow glass tubes to  
produce their famous luminous glow an  
electric current is run through the neon  
gas mixed with a small percentage of  
argon which produces a reddish orange  
light''flickering light a history of neon  
artreview

May 4th, 2020 - flickering light  
describes not only the merical  
development of neon as advertising and  
signage but more interestingly weaves  
around this its cultural influence as  
metaphor and inspiration for the writers  
artists and musicians who throughout the  
twentieth and early twenty first  
centuries have made reference to it in  
their work''history of neon signs gees  
claude and liquid fire

June 2nd, 2020 - the theory behind neon  
sign technology dates back to 1675 before  
the age of electricity when the french  
astronomer jean picard observed a faint  
glow in a mercury barometer tube when the  
tube was shaken a glow called barometric  
light occurred but the cause of the light  
static electricity was not understood at

**'fluorescent lamp**

June 2nd, 2020 - a fluorescent lamp or  
fluorescent tube is a low pressure  
mercury vapor gas discharge lamp that  
uses fluorescence to produce visible  
light an electric current in the gas  
excites mercury vapor which produces  
short wave ultraviolet light that then  
causes a phosphor coating on the inside  
of the lamp to glow a fluorescent lamp  
converts electrical energy into useful  
light much more efficiently'
