Building A Deep Learning Model using Keras Towards Data

April 30th, 2020 - Deep learning is an increasingly popular subset of machine learning Deep learning models are built using neural networks A neural network takes in inputs which are then processed in hidden layers using weights that are adjusted during training Then the model spits out a prediction The weights are adjusted to find patterns in order to make'

'Learning TensorFlow A Guide to Building Deep Learning

April 23rd, 2020 - Once you finish this book you'll know how to build and deploy production ready deep learning systems in TensorFlow Get up and running with TensorFlow rapidly and painlessly Learn how to use TensorFlow to build deep learning models from the ground up Train popular deep learning models for computer vision and NLP'

'Theoretical and Advanced Machine Learning TensorFlow

April 27th, 2020 - You should already have background knowledge of how ML works or completed the learning materials in the beginner curriculum Basics of machine learning with TensorFlow before continuing with this additional content The below content is intended to guide learners to more theoretical and advanced machine learning content'

'PDF TensorFlow A GUIDE TO BUILDING DEEP LEARNING SYSTEMS

April 18th, 2020 - Deep learning has emerged in the last few years as a premier technology for building intelligent systems that learn from data Deep neural networks originally roughly inspired by how the human brain learns are trained with large amounts of data to'
