October 12th, 2018 - Solved Problems 2 Problems 2 Find the y parameters for the 2 port networks

shown Solution We consider two cases to find out the y parameters
Case I Making port 2 shorted and applying a voltage of V_1 at port 1
By KVL $17I_1 + 20I_2 = V_1$ and $12I_1 + 20I_2 = 0$
Solving I_2
Case II Making port 1 shorted and applying a voltage of V_2 at port 2
By KVL $17I_1 + 20I_2 = 0$ and $12I_1 + 2V_2 = 0$

October 11th, 2018 - Hello again
i need help understanding how
to approach this problem we
need to find the output
resistance R_o my first approach
was to use Z parameters and
more specifically only the Z_{22}
parameter port 2 is the one
where R_o is so i set i_1 the current
from the source V_s to zero
effectively disconnecting V_s and
then solving for v_2 i_2 my answer
in this method is incorrect"**Attia**
