### **'stereoselectivity**

May 29th, 2020 - in chemistry  
stereoselectivity is the property of a  
chemical reaction in which a single  
reactant forms an unequal mixture of  
stereoisomers during a non  
stereospecific creation of a new  
stereocenter or during a non  
stereospecific transformation of a pre  
existing one the selectivity arises  
from differences in steric effects and  
electronic effects in the mechanistic  
pathways leading to the'

### **'stereoselective and stereospecific synthesis authorstream**
