## Cenozoic Paleoceanography of the Central Arctic Ocean

October 12th, 2019 - Paleoceanography and Paleoclimatology publishes original research articles dealing with all aspects of understanding and reconstructing Earth's past climate and environments from the Precambrian to modern analogs'

## 'The Numerical Simulation of Ice Age Climate with a Global

August 31st, 2019 - Abstract The global distribution of July climate has been simulated with a two level atmospheric general circulation model using the surface boundary conditions of sea surface temperature ice sheet topography and surface albedo assembled by CLIMAP for 18 000 years before present These conditions respresent an approximate doubling of the ice"**Paleoceanography Volume 23 Issue 1 March 2008 Wiley**

November 21st, 2019 - Age model and core seismic integration for the Cenozoic Arctic Coring Expedition sediments from the Lomonosov Ridge Jan Backman Martin Jakobsson Martin Frank Francesca Sangiorgi Henk Brinkhuis Catherine Stickley Matthew O Regan Reidar Løvlie Heiko Pälike David Spofforth Jérôme Gattacecca Kate Moran John King and Chip Heil' **Paleoceanography SpringerLink**

November 28th, 2019 - Jorissen FJ Fontanier C Thomas E 2007 Paleoceanographical proxies based on deep sea benthic foraminiferal assemblage characteristics In Hillaire Marcel C de Vernal A eds Proxies in Late Cenozoic paleoceanography Elsevier Amsterdam pp 263?326 CrossRef Google Scholar'

## 'Department of Geology IGNTU Amarkantak

November 27th, 2019 - applications in Paleoceanography and paleoclimatology Unit III The Use of Oxygen and Carbon Isotopes of Foraminifera in Paleoceanography Radiocarbon Dating of Deep Sea Sediments Elemental Proxies for Reconstructing Cenozoic Seawater Paleotemperatures from Calcareous Fossils"PDF The great challenges in Arctic Ocean paleoceanography

November 25th, 2019 - The great challenges in Arctic Ocean paleoceanography 2007 Proxies in late Cenozoic paleoceanography Developments in Marine Geology vol 1 Amsterdram Elsevier pp 1 843 6 Thiede J Clark D L and Hermann Y 1990 Late Mesozoic and Cenozoic paleoceanography of'tel archives ouvertes fr

November 10th, 2019 - Sédimentation dans le centre du bassin Arctique Les sédiments Crétacé à Paléogène du forage ACEX unités 2 à 4 sont caractérisés par de forts COT compris entre 1 et 5 Dans le détail l unité 3 a pour valeur moyenne de COT 1 et l unité 2 constituée en partie de boue biosiliceuse à un COT moyen de 2 3 Fig 6 3'

## 'Arctic sea ice proxies Comparisons between biogeochemical

June 20th, 2019 - De Vernal A Van Nieuwenhove N Radi T 2013 c Dinocyst assemblages as proxies of sea surface conditions Towards quantitative approaches in Late Cenozoic paleoceanography In 10th International Conference on modern and fossil dinoflagellates Workshop No 3 San Francisco CA October 20?24 2013 Google Scholar' **Paleoceanography Find link**

October 23rd, 2019 - quantitative paleoceanography based on microfossils In Hillaire Marcel and de Vernal eds Proxies in Late Cenozoic Paleoceanography Elsevier pp Allison Guyot 4 888 words view diff exact match in snippet view article find links to article'

## 'Polar front shift and atmospheric CO2 during the glacial

December 26th, 2019 - 2007 in Developments in Marine Geology Planktonic foraminifera as traces of past oceanic environments in proxies in late Cenozoic palaeoceanography eds Hillaire Marcel C De Vernal A Elsevier Amsterdam Vol 1 pp 213 ? 262"Evidence for global cooling in the Late Cretaceous

**June 16th, 2014 - One of the warmest climates of the past 140 million years occurred in the early Late Cretaceous late Cenomanian?early Turonian between 95 and 90 Ma 1 2 3 4 with ice free polar regions 5 tropical sea surface temperatures SSTs greater than 35 °C ref 2 and shallow latitudinal temperature gradients 6 7"Evolutionary History of Atmospheric CO2 during the Late**

December 27th, 2016 - The latter two proxies are terrestrial based proxies that reflect paleo CO 2 atm directly although they rarely provide continuous paleo CO 2 atm records for a long geological time Therefore while there is a consensus on the general tendency of the Cenozoic paleo CO 2 atm changes the estimated paleo CO 2 atm values vary greatly"**PDF C isotopes**  
December 25th, 2019 - Mid Jurassic through Cenozoic curves have been mainly derived from pelagic carbonates and exhibit low amplitude ? 13 C carb variability from ?1 to 4? relative to curves for the earlier part of the record from ?3 to 8 ? for the Phanerozoic from ?15 to 15? for the Proterozoic and Archean'

**'Modeling the Miocene climatic optimum Ocean circulation**  
**December 15th, 2019 - is symmetrical about the equator and resembles that simulated for late Cretaceous and early Cenozoic climates suggesting the northern hemisphere dominated ocean heat transport active today developed after the middle Miocene Simulated deep water warming in the Miocene is more than an order of magnitude lower than indicated by proxies'**  
**'Australian shelf sediments reveal shifts in Miocene**  
**May 10th, 2017 - ?Elemental proxies for palaeoclimatic and palaeoceanographic variability in marine sediments Interpretation and application? in Proxies in Late Cenozoic Paleooceanography C Hillaire Marcel A De Vernal Eds Elsevier 2007 pp 567?644'**

**'Paleoceanography Find link**
