'notes on verilog programming

April 24th, 2020 - in embedded systems the advantage of using  
fpgas and verilog or any programmable hardware and hdl rather  
than a conventional processor and programming language is  
parallelism and simplicity with fpgas and verilog you can  
always add more functions in parallel with no penalty in  
speed or plexity just use more modules more pins and if  
needed more or bigger fpga chips'
